

Free H1N1 Influenza (Swine Flu) Vaccination Clinic

Located at

**Emerald Ridge High School
12405 184th St. E, Puyallup
October 24, 2009
9 am – 4 pm**

Why does my child need flu vaccine?

- Vaccine prevents influenza, which can be a serious disease for children.
- Vaccine can prevent the spread of the highly contagious 2009 H1N1 virus .
- Kids will have fewer days absent from school if they are vaccinated.
- Parents will have to take fewer days off work to care for a sick child.

Tell me more.....

- This clinic is only for children who are 6 months through 24 years.
- Most vaccine will be available in the nasal spray form.
- Those with a chronic medical condition such as asthma or diabetes or women who are pregnant should receive the H1N1 vaccine through their family physician.
- Children must be accompanied by a parent or guardian.
